

Equity in Education

I am writing today in support of Tuition Equity. A move towards allowing higher education to be available to all Oregon high school graduates would be positive for Oregon. Allowing undocumented members of our community access to a post-secondary education will make Oregon stronger. This state wins by creating more educated individuals who will work for Oregon to give back to this state through taxes and creating a strong work force. By educating these students we are keeping jobs in Oregon for Oregonians, we are supporting our local economy as well as our local university system. These individuals will help the enrollment of Oregon Universities by not only bringing in money but by also supporting a diverse educational environment. As a student in the Oregon University System I feel it is important that the opportunities I've received in my education to be available to all. Tuition Equity upholds the values of Oregon by helping those who have worked hard to achieve their goals. Support Oregon and support its students with Tuition Equity.

Sincerely,
Leslie Nysten
